

Stakeholder Map — Filled Example: “Clean Air Now”

Project / Campaign: Clean Air Now — clean-trucking ordinance **Date:** March 2025 **Facilitator:** Student organizing team

Student organizers want their city to pass a clean-trucking ordinance limiting diesel truck traffic near homes and schools by the freeway corridor.

Step 1 — Stakeholder Inventory

Stakeholder	Type	Relationship to us	Impact (1–5)	Influence (1–5)	Quadrant
Parents living near freeway	Individuals	Supportive, some active	5	2	Q2
Youth with asthma (and peers)	Individuals	Core members	5	3	Q2
Neighborhood association	Org	Friendly, cautious	4	3	Q1
School nurses & pediatric clinic	Professionals	Sympathetic experts	4	4	Q1
City Council president	Agency	Undecided	2	5	Q4
Council transportation committee	Agency	Mixed	2	5	Q4
Logistics & trucking lobby	Business	Opposed	2	5	Q4
Local environmental nonprofit	Org	Ally, limited capacity	3	4	Q1
Local newspaper health reporter	Media	Neutral, interested	1	4	Q4
Residents elsewhere in city	Individuals	Mostly unaware	2	2	Q3

Step 2 — How the Quadrants Drove Tactics

- **Q1 (Campaign core):** Neighborhood association, school nurses, environmental nonprofit → invited into a strategy table; media trainings so they can speak for the campaign.
- **Q2 (Narrative drivers):** Parents and youth scored 5 on impact but only 2–3 on influence → listening sessions to gather testimony, then storytelling and public-comment coaching so their experiences lead the narrative.
- **Q3 (Keep informed):** Residents citywide → monthly newsletter and social updates; activate if route changes touch their streets.
- **Q4 (Decision-makers / validators):** Council leaders and the logistics lobby have low direct impact but high power → prepared a health + economic brief, secured nurse and business-ally endorsements *before* requesting meetings; pitched the health reporter a data-plus-family story.

Step 3 — Engagement Assignments

Stakeholder	Quadrant	Outreach approach	Messenger	Deadline	Status
Council president	Q4	1:1 meeting w/ health brief + endorsements	Nurse + youth leader	Apr 15	Scheduled
Transportation committee	Q4	Public comment at hearing	5 parent testifiers	Apr 22	Prepping
Parents near freeway	Q2	Listening sessions (2)	Student team	Apr 5	Done
Youth members	Q2	Public-comment coaching workshop	Env. nonprofit trainer	Apr 12	Scheduled
Health reporter	Q4	Story pitch: asthma data + family profile	Comms lead	Apr 8	Sent
Neighborhood association	Q1	Joint strategy meeting	Campaign co-chairs	Apr 3	Done

Step 4 — Review

- ✓ Every stakeholder has scores and a quadrant
- ✓ Every Q1 and Q4 stakeholder has a named messenger and deadline
- ✓ Assignments copied into the project tracker
- ✓ Revisit date scheduled: June 2025 (after the committee vote)
